Re: Cornell-Dubilier Electronics Superfund site
South Plainfield, New Jersey

Dear Mr. Nielsen:

This is in response to your letter, dated January 13, 2004, regarding the comparative analysis conducted by Environ for remedial alternatives for contaminated soils at the Cornell-Dubilier Electronics (CDE) site, presented to the National Remedy Review Board in July 2003 by the Hamilton Industrial Park Potentially Responsible Party Group.

As you are aware, the U.S. Environmental Protection Agency (EPA) is in the process of preparing the Feasibility Study (FS) for Operable Unit 2 at the CDE site. Operable Unit 2 (OU2) addresses the remediation of source materials, including contaminated facility soils and buildings. EPA will evaluate the information provided in Environ's January 13th letter as the FS for OU2 is prepared. EPA will keep you informed of this work as it proceeds.

Please feel free to contact me at 212-637-4395 if you have any additional comments or questions.

Sincerely yours,

Peter Mannino, Remedial Project Manager
Central New Jersey Remediation Section
